

Prepare Tools and Materials

1. Clean water

2. Ladder (if the crystal light is high)

3. Cut off the power: Before cleaning the crystal chandelier, be sure to cut off the power first to avoid electric shock.

4. Special crystal lamp cleaner or neutral detergent: do not use ordinary cleaning agents to clean the crystal chandelier, otherwise it may corrode the crystal. It is recommended to use a special crystal lamp cleaner, or use a soft cloth dipped in a small amount of neutral detergent for cleaning.

5. Carefully remove the crystal beads: If the crystal beads on the crystal chandelier can be removed, you can first remove the crystal beads and clean them separately. This prevents the crystal beads from scratching during the wiping process.

6. Pay attention to the wiping method: choose a soft cotton or wool duster, when wiping the crystal chandelier, to use a soft dry cloth gently wipe, do not exert too much force, so as not to scratch the crystal. For the gap between the crystal beads, you can use a fine brush to clean.

Specific cleaning steps

1. Tools: Prepare special crystal lamp cleaner, soft cloth, fine brush, and gloves.

2. Cut off the power: Cut off the power of the crystal chandelier.

3. Remove the crystal beads (if you can).

4. Clean the light stand: Wipe the light stand with a soft cloth dipped in detergent.

5. Clean the crystal beads: wipe the crystal beads with a soft cloth dipped in detergent, or clean the gap between the crystal beads with a fine brush.
6. Dry the water: dry the water on the crystal chandelier with a dry cloth.
7. Install the crystal beads (if removed).
8. Dry before installation: It should be dried before installation
9. Restore the power supply: Turn on the power supply and check whether the lamp works normally

When cleaning the crystal chandelier, the following matters should be noted:

Do not use hard objects to wipe the surface of the crystal chandelier, so as not to scratch the crystal.

Do not use acid and alkaline cleaning agents to clean the crystal chandelier, so as not to corrosion the crystal.

Do not immerse the crystal chandelier in water.

Work at height should pay attention to safety.

Cleaning Tips:

When cleaning the crystal lamp, wear gloves and a mask to prevent dust from entering the eyes and respiratory tract.

If there are stubborn stains on the crystal lamp, you can use a cotton swab dipped in detergent to clean it.

After cleaning the crystal lamp, it should be placed in a cool place to dry.

If you have any questions, please feel free contact to us, THANK YOU!
