1. Introduction

Thank you for buying our crystal chandelier. To ensure the safe and correct installation of the chandelier, please read this manual carefully and follow the steps.

2. Safety tips

Ensure that the power supply is off before installation.

Use insulation gloves during installation.

Make sure the chandelier is installed in a position that can support the weight of the chandelier.

If you are not familiar with electrical installation, seek professional help.

3. Tools required

screwdriver

Electric drill

Insulating tape

Wire cutters

Scaffolding or ladder

If you have any questions, please feel free contact to us, THANK YOU!

4. Installation Procedure

4.1 Preparations

Make sure that all parts in the package are complete, including brackets, wires, lamp holders, crystal pendants, etc.

Clean the installation position and ensure that there is no dust or debris.

Turn off the power and prepare the necessary tools and materials.

4.2 Installing the support

According to the chandelier instructions, determine the installation position of the support.

Use an electric drill to drill holes in the installation location and insert expansion bolts.

Secure the support to the expansion bolt and tighten the screws.

4.3 Installing cables and lamp holders

Thread the chandelier wire through the bracket.

Connect the lamp holder to the wire according to the model of the lamp holder.

Attach the bulb to the lamp holder.

4.4 Installing crystal pendant

According to the chandelier instructions, install the crystal pendant one by one onto the bracket.

Be careful to install gently to avoid breaking the crystal pendant.

4.5 Checking and testing

Turn on the power and check that the light bulb is on.

Gently shake the chandelier to ensure it is securely installed.

If you have any questions, please feel free contact to us, THANK YOU!

5. Precautions

When installing the chandelier, do not exert too much force to avoid damaging the chandelier.

After installing the chandelier, please check and clean the chandelier regularly to maintain the brightness of the chandelier.

When replacing a light bulb, turn off the power first and wait until the light bulb cools before replacing it.

6. Common problems and solutions

6.1 Problem: The chandelier is not bright after installation.

The solution:

Check that the power supply is turned on.

Check that the light bulb is installed correctly.

Inspect lamp holders and wires for damage.

6.2 Problem: Chandelier wobbles.

The solution:

Check that the support is securely installed.

Check that the crystal pendant is installed correctly.

6.3 Problem: Crystal pendant is broken.

The solution:

Contact the seller to replace the broken crystal pendant.

Please note that the above are only common problems and solutions, and specific circumstances may vary. If you encounter any problems during the installation of the chandelier, please consult a professional.

If you have any questions, please feel free contact to us, THANK YOU!
